

## ACKNOWLEDGMENTS

The RAND Summer Institute on the Demography, Economics, and Epidemiology of Aging annually brings together research scientists from the centers on population aging supported by the US National Institute on Aging. The tenth anniversary Summer Institute, held at Santa Monica, California, 11–12 July 2003, provided an occasion for highlighting some recent achievements of aging research in the social sciences undertaken in these centers. This volume is largely based on the papers presented at this conference. The authors and the editor express their gratitude to Bob Schoeni and Lora Myers of the Michigan Center on the Demography of Aging, and Dana Goldman and Dawn Matsui at RAND for their role in organizing the meeting. We also thank the Michigan Center for logistic support and Bob Schoeni for encouragement and advice during the production of this supplement.

Financial support for both the conference and the volume came from the Office of Behavioral and Social Research, National Institute on Aging. We wish to acknowledge in particular the instrumental role of Richard Suzman, Associate Director of the Office. Without Richard's vision, persistence, and willingness to support new directions and new ideas, the demography and economics of aging would not be the vibrant, productive, exciting research arena that it has become. Of course, Richard's vision would have come to little without the support of Richard Hodes, Director of the National Institute on Aging, and, ultimately, the support of the US National Institutes of Health.

This publication was also supported by contributions from:

- Center for the Demography and Economics of Aging at the University of California at Berkeley
- Center on the Demography and Economics of Aging at the University of Chicago
- Population Aging Center at the University of Colorado
- Center for Demographic Studies at Duke University
- Center on the Demography of Aging at the University of Michigan
- Center for Aging and Health Research, NBER
- Population Aging Research Center at the University of Pennsylvania
- Center for the Study of Aging at RAND
- Center on the Demography and Economics of Health and Aging at Stanford University
- Center on Biodemography and Population Health at USC-UCLA
- Center for Demography of Health and Aging at the University of Wisconsin-Madison

We also thank the editorial staff of *Population and Development Review* for their assistance in producing this volume.
