Fronteras de la Salud Reproductiva (FRONTERAS) es un programa global de investigación, de Population Council, cuyo fin es mejorar la prestación de servicios de planificación familiar y salud reproductiva en los países en vías de desarrollo. FRONTERAS se centra en la investigación de operaciones, la cual usa técnicas sistemáticas de investigación para mejorar la prestación de servicios e influir en las decisiones sobre políticas al respecto. FRONTERAS está realizando casi 100 proyectos de investigación en África, Asia, Europa Occidental y América Latina.

MEASURE *Communication* produce materiales (impresos, en vídeo y electrónicamente) sobre países específicos y a nivel mundial; proporciona asistencia técnica y capacitación a instituciones en los países en desarrollo, para mejorar la comunicación de los resultados de las investigaciones a las autoridades que diseñan las políticas y a otros agentes públicos no especializados; facilita la formación de redes entre los medios de comunicación y expande el uso de nuevas tecnologías y nuevos formatos en pos de una comunicación eficaz. El proyecto se está llevando a cabo actualmente en Kenya, Madagascar, Tanzania, Senegal, Uganda, Camboya, Tailandia, India, Rumania, Kazajistán, Rusia, México, Brasil y Costa Rica.

El PRB es el líder en proveer información oportuna y objetiva acerca de tendencias de población nacionales e internacionales, y sus consecuencias.

Este trabajo fue financiado por la Agencia de Estados Unidos para el Desarrollo Internacional (USAID), bajo el proyecto de MEASURE *Communication* (HRN-A-00-98-000001-00).
