5:55 pm Thank you and closure

The Postabortion Care (PAC) Consortium works to inform the reproductive health community about possible complications related to miscarriage and incomplete abortion, and to promote postabortion care as an effective strategy for addressing this global problem. Individually and in collaboration, the PAC Consortium agencies implement postabortion care programs around the world, and also encourage technical agencies, governments and donors to incorporate postabortion care into their own programs and policies as a critical step in reducing deaths and injuries of women from complications related to miscarriage and abortion-related consequences.

Membership in the PAC Consortium is open. Signing up as a member enables you to:

- Receive and contribute information and resources on PAC as part of the PAC Consortium listserv
- Participate in all aspects of the PAC Consortium general meetings (held twice-yearly in conjunction with Global Health Council and APHA) and task forces
- Sign on to statements issued by the Chair in consultation with the Advisory Group members

To join the PAC Consortium and be a part of the listserv, send an e-mail to PAC-CONSORTIUM-requests@lists.ibiblio.org

The Postabortion Care Consortium publishes a semiannual newsletter, PAC in Action, to share information with colleagues. We have a limited number available and are happy to ship them to you or your organization. To request printed copies of the newsletter please send an e-mail to info@pac-consortium.org

See our website for more information, past meeting minutes, Task Force Minutes, Resources, the PAC Model, our bi-annual newsletter and more: http://www.pac-consortium.org
